

## Pulp Clamps

Pulp Clamps - There are a lot of different forklift accessories that can be used in order to make forklifts much more useful. Snowplow attachments can be mounted onto the front part of a forklift. A scoop bucket can be helpful when the task requires transferring sand, gravel, soil or snow. A double block handler permits the person operating the forklift to pick up two loads and afterward stack them side-by-side. Many of those accessories are really great for light to medium tasks.

Another lift truck attachment is the package lift clamp, that could carry and transfer really heavy pallets. Moreover, pallet crane forks could be utilized to carry and move pallets with an overhead crane. A drum clamp accessory is helpful for transferring heavy drums from place to place without having to use a pallet. Lift truck mounted hoppers enable material to be moved and dumped without having to handle it manually. These hoppers when the bumper is released are self dumping.

Obtainable attachments now include accessories that allow a lift truck to execute the job of a commercial broom or mop. Such particular attachments are most frequently utilized cleaning parking areas, warehouse flooring, and boat docks. Forklift mounted platforms are available equipped with dual entry doors and could be attached to move staff from one area to another. The mounted platform attachment is nice for reaching parts which are difficult to access, specifically when you have merchandise or supplies stored in out of the way locations or really up high.

It is a handy choice to install lift truck attachments that can instantly transform a forklift truck right into a mobile crane unit. This particular equipment is very useful when it comes to moving loads which can be unstable or tricky. This accessory can either be telescopic, mounted on the carriage itself, or be attached or lift truck mounted.
