

JLG Forklift Parts

JLG Forklift Parts - In the late 1960's John L. Grove, with his wife Cora set out on a cross country journey in their RV. Recently retired, after spending many years working with his brother to build their crane company into an industry leader, John had no idea that fateful trip would allow JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision material handling technologies was the end result of a road trip.

During their trip, John reacquainted himself with former business connections along the way. In combination with these conversations and a significant event; two workers had been unfortunately electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John discovered a substantial marketplace for a product that could quickly and safely elevate individuals in the air to accomplish upkeep and other construction services.

Upon returning from their travels, John established a partnership with two friends and bought a metal fabricating company in McConnellsburg, Pennsylvania. In 1970, opening operations with a crew of twenty employees, they manufactured and sold the first JLG aerial work platform. The business incorporates many of the simple design elements of that original lift into existing models.

JLG forklifts have come a ways from the time when Mr. John L. Grove returned to town from his cross-country road trip and since the first aerial work platform debuted on the market. Nowadays, the business proudly continues to expand itself into a range of markets worldwide and develops new products to make certain consumers are capable of being more efficient and perform in the workplace within a safer atmosphere.
