Doosan Infracore America is the fastest growing forklift business in the North American market, due to their reliability in retaining a high level of consumer service quality and optimum product functioning to all Doosan Infracore Lift Truck users. The U.S. forklift division located in Cleveland has a expert team experienced in Product Sales, Purchasing, Advertising, Logistical and Technical Support.

At first the home-based lift truck market in Korea was an open import enterprise. Korea Machinery Co. Ltd. began in 1960, to import fully assembled forklifts as part of a domestic equipment expansion venture. Sales of these products were originally targeted to state-run firms, large scale organizations, and the armed forces. This eventually led to a merger with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division begun business operations throughout Korea to service and sell this heavy equipment. By 1978, a forklift production plant was successfully completed. Continuous technical training became the new focus for enhancing quality and product development.

Daewoo started the first home-based lift truck business in 1967, and rapidly gained a whopping 90% share in the Korean Materials Handling market. By the 1980's, Daewoo's sophisticated technological advancements combined with sales success placed them in a situation of substantial growth of their forklift business.

Caterpillar Industrial Inc. of the U.S. in 1981, proposed a cooperative venture project to assist them in the very competitive North American materials handling market. This joint-venture proved highly successful for Daewoo and their lift truck sales expanded greatly. In 1984, the company finished construction of a new facility to help in producing high end value-added goods for export. In 1993, the corporation had a international sales system and started exporting designs they had developed through in-house expertise, as an sovereign product. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing expansion opportunities into international marketplaces.
