

## Clark Forklift Part

Clark Forklift Parts - Performing worldwide, there are currently 350,000 Clark forklifts and lift vehicles in operation, with in excess of 250,000 of those in use in North America. Clark has five major lines of forklifts across the globe, making it one of the most expansive corporations in the industry. Heavy duty vehicles ranging from 1,500lb to 18,000lb capacities, dual fuel, gas, LPG, hand powered lift trucks, narrow-aisle stackers and electric riders are some of their specialties.

Clark Totalift, handles more than 120,000 specific parts designed for 20 exclusive designs of lift trucks and automated equipment. Your local Clark Seller is your total source for availability of all your components needs provided by Clark Totalift.

Clark features a exceptional Parts Distribution team. The parts warehouses are conveniently stationed in Changwon, South Korea and Louisville, Kentucky to guarantee exceptional service to both their buyers and their sellers. For over 90 years, Clark has exceeded industry standards, being one of the most actively advancing manufacturers. Motivated to provide the highest level of value and service to our clients, Clark remains on the leading edge when it comes to improving output and benefiting performance.

Worldwide, Clark has one of the most impressive dealer support networks. With over 550 locations worldwide, seller representation in over 80 countries and 230 locations in North America, their high level of commitment to their consumers predominates the materials handling industry.

Clark proudly remains an progressive leader of the material handling industry, revolutionizing safety features such as the worker restraint system. This exceptional dedication to safety is at this time a customary feature on every lift truck.

Clark has a unyielding goal to have the No. 1 quality system in the industry which is demonstrated by their dedication to ISO standards. Clark, is the first manufacturer of forklifts and lift vehicles to be globally certified with quality standard ISO 9001 in all of its production facilities. Also, the ISO 14001 Environmental Conservancy System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement allows Clark to be prepared for any number of environmental restrictions, thus placing them in a dominant market position.

Clark has preferred the particularly economical and beneficial structure of "Lean Production" for its assembly plants and application of resources. This structure was developed to acknowledge the most efficient approaches of manufacturing plant stewardship and ensuring maximum proficiency. Clark has concluded this transition of its Korean plant. COPS which is Clark Optimized Production System, similarly focuses on quality of product and services and manufacturing efficiencies.

Clark's product engineers and suppliers communicate together to improve the effectiveness and brilliance of their products while minimizing costs. The new value engineering program combines innovative product development and provides superior customer support and service within the industry.
